

Contracts Module - Bounded Context Description

Module Name

Contracts

Responsibilities

The Contracts module is responsible for managing gym membership contracts throughout their lifecycle:

- Preparing new contracts for customers (with business rule validation)
- Signing prepared contracts within allowed timeframes
- Enforcing business rules: adult-only (age ≥ 18), height limits ($\leq 210\text{cm}$), previous contract must be signed, 30-day signing window
- Publishing domain events when contracts are signed (ContractSignedEvent)

Not Responsible For

- Managing gym passes (handled by the Passes module, which reacts to ContractSignedEvent)
- Generating offers or reports
- Customer profile management

Data Owned

The Contracts module owns the `Contracts.Contracts` database table with the following data:

- Contract ID
- Customer ID
- Prepared At (timestamp)

- Duration (standard 365 days)
- Signed At (nullable - set when contract is signed)
- Expiring At (nullable - calculated upon signing)
